

Self-declaration

for point of origins of carbon dioxide (CO₂)

Point of origin: _____
 Street: _____
 Postal code, city: _____
 Country: _____

The delivered CO₂ stems from a source that is eligible to be credited under e_{ex-use} in accordance with Delegated Regulation (EU) 2023/1185 and has not been produced deliberately.

Recipient: _____
 Contract or contract number: _____
 Amount of CO₂: _____ tonnes per year
 (Please check the items that apply.)

1	<input type="checkbox"/> The CO ₂ has been captured from an activity listed under Annex I of Directive 2003/87/EC and has been taken into account upstream in an effective carbon pricing system* (until 2036) and <input type="checkbox"/> An equivalent quantity of emission allowances is cancelled for the quantity of CO ₂ supplied.
2	<input type="checkbox"/> The CO ₂ has been captured from an activity listed under Annex I of Directive 2003/87/EC, has been taken into account upstream in an effective carbon pricing system* and the CO ₂ does not stem from the combustion of fuels for electricity generation. and <input type="checkbox"/> An equivalent quantity of emission allowances is cancelled for the quantity of CO ₂ supplied.
3	<input type="checkbox"/> The CO ₂ is of biological origin and stems from an installation that uses solid or gaseous biomass fuels to generate electricity, heating and cooling and the installation does not have to fulfil the sustainability and greenhouse gas savings criteria due to the minimum total rated thermal input referred to in Article 29(1) of Directive (EU) 2018/2001.
4	<input type="checkbox"/> The CO ₂ is of biological origin and stems from an installation that produces gaseous biomass fuels, and the installation does not have to fulfil the sustainability and greenhouse gas savings criteria due to the minimum flow rates referred to in Article 29(1) of Directive (EU) 2018/2001.
5	<input type="checkbox"/> The CO ₂ has been captured from the air.
6	<input type="checkbox"/> The CO ₂ stems from a geological source and the CO ₂ was previously release naturally.
7	<input type="checkbox"/> The data relevant for the calculation of e _i is provided to the fuel producer and, upon request, to the certification body approved by REDcert for validation.

Note: With this declaration, the point of origin acknowledges that auditors of the accredited certification bodies may verify whether the relevant requirements stipulated in Revised Directive (EU) 2018/2001 have been satisfied. It should be noted that the auditors of the certification bodies may be accompanied by a competent authority who monitor their activities. In addition, REDcert employees as well as auditors recognised by REDcert must be granted the right to conduct a special audit or a witness audit. Furthermore, the point of origin acknowledges that his name and address will be registered in the mandatory Union database (UDB) for the purpose of traceability of feedstocks.

Location, date _____
